Java Programmer

PROFESSIONAL SUMMARY

Java Developer with 3 years of hands-on experience in designing, developing, and maintaining enterprise-grade applications. My expertise lies in Spring Boot, REST APIs, PostgreSQL, and multi-tenant architectures, with a strong focus on delivering secure and efficient solutions.

Currently, I am contributing to large-scale Finance Module projects for state government clients such as the Municipal Corporations of Delhi and Haryana, covering 87 Urban Local Bodies (ULBs) and serving thousands of active users. My role involves end-to-end development, optimization of backend services, and ensuring smooth integration across critical modules.

I am passionate about building impactful applications that improve governance, finance management, and citizen services at scale. Always eager to learn emerging technologies, explore best coding practices, and contribute to challenging projects.

AREAS OF EXPERTISE

✓ Java	✓ Spring Boot	✓ SQL(PostresSQL, MySQL)
✓ JSP	✓ Angular	✓ RESTAPIs
✓ GIT	✓ Linus & Windows	✓ HTML, CSS & Javascript

PROFESSIONAL EXPERIENCE

SPARROW SOFTECH PVT. LTD. | INDIA | OCT 2024 – PRESENT

Programmer – Java / Spring Boot Developer

- Designed, developed, and implemented Finance and Accounting systems for large-scale government digital governance platforms (UPYOG – Haryana & Delhi) using Java 8, Spring Boot, RESTful APIs, and Microservices architecture.
- Developed and optimized backend services including voucher management, general ledger, fund management, and budget modules.
- Utilized Git, GitHub Actions, and Jenkins for version control.
- Contributed to performance tuning and database optimization using PostgreSQL and Redis for caching mechanisms.
- Worked closely with the QA and DevOps teams to ensure seamless delivery and deployment on cloud-based environments (AWS/GCP).
- Developed user manuals and technical documentation, and provided support and training to end users for smooth adoption.

Key Projects:

- Finance and Accounting Software for UPYOG – Haryana, India** Implemented the Finance and Accounting module for 87 Urban Local Bodies(ULBs) under the UPYOG initiative.
 - Design backend APIs for voucher voucher processing, bill register, and chart of accounts modules.
 - Performed gap analysis and system enhancements to align with the Haryana ULB finance workflows.
 - Developed and maintained Spring Boot microservices integrated with existing e-Governance modules.
- Finance and Accounting Software for UPYOG – Delhi, India** Customized and deployed the UPYOG Finance module for the Delhi State Government.
 - Extended existing microservices to supprot Delhi-specific accounting and finance reporting requirements.
 - Ensure smooth integration with existing modules such as property tax and procurement.
 - Worked closely with functional teams to verify module functionality and client acceptance.

Software Engineer

- Designed and implemented database schemas, stored procedures, and data access layers using Spring Data JPA and PostgreSQL.
- Collaborated closely with cross-functional teams including UI/UX, QA, and DevOps to deliver end-to-end product solutions.
- Guided UI/UX design decisions such as branding, color themes, and interactive flows to enhance user experience and engagement.
- Developed and implemented pricing strategies for services, contributing to revenue growth.

Key Projects:

- **Campus Automation System**

A comprehensive digital solution to automate academic, administrative, and financial operations for educational institutions.

- Developed backend services for student management, attendance tracking, fee management, and exam scheduling.
- Integrated REST APIs with the Angular frontend, ensuring seamless real-time data flow.
- Designed relational database structures and optimized SQL queries for high-performance data access.
- Implemented secure user roles and permissions using Spring Security.

EDUCATION

.....

-
- Bachelors of Technology (Computer Application), DRIEM University, Cuttack, India | 2022
 - Formal Education, ICSE Board, Jharkhand, India | 2018
