

HARSHIKESH SINGH

Java Developer | Spring Boot | Microservices | REST APIs
New Delhi, India • +91 9771719213 • harshikeshsingh.2000@gmail.com

PROFESSIONAL SUMMARY

Results-driven Java Developer with 4 years of hands-on experience architecting and delivering enterprise-grade, cloud-deployed applications using Java 8/11, Spring Boot, Spring MVC, Spring Security, and Microservices. Proven track record of building large-scale Finance & Accounting platforms serving 87+ Urban Local Bodies (ULBs) across Delhi and Haryana state governments with thousands of concurrent users. Deep expertise in RESTful API design, Hibernate/JPA, PostgreSQL, Redis caching, and CI/CD pipelines (Jenkins, GitHub Actions). Collaborative team player who thrives in Agile/Scrum environments, partnering with cross-functional UI/UX, QA, and DevOps teams to deliver secure, scalable, and maintainable software solutions.

TECHNICAL SKILLS

Languages:	Java 8/11, SQL, JavaScript, HTML5, CSS3
Frameworks:	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate
APIs & Arch:	RESTful APIs, Microservices Architecture, JSON, XML
Databases:	PostgreSQL, MySQL, SQL Server
Cloud & DevOps:	AWS, Docker, Jenkins, GitHub Actions, CI/CD Pipelines
Tools:	Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code
OS / Other:	Linux, Windows, JSP, Agile/Scrum

PROFESSIONAL EXPERIENCE

Sparrow Softech Pvt. Ltd. | India

Oct 2024 – Present

Java Developer – Spring Boot & Microservices

- Designed and implemented Finance & Accounting modules for UPYOG — a large-scale e-Governance platform — serving 87+ Urban Local Bodies (ULBs) across Delhi and Haryana state governments using Java 8, Spring Boot, and Microservices architecture.
- Designed and optimized 20+ RESTful APIs consumed by React frontend and third-party e-Gov integrations (property tax, procurement), achieving sub-200ms average response times.
- Improved PostgreSQL query performance by 35% through strategic indexing, query refactoring, and Redis caching for high-frequency read operations.
- Collaborated with QA and DevOps teams in an Agile/Scrum environment to ensure on-time delivery, perform code reviews, and maintain test coverage above 80%.
- Authored comprehensive technical documentation and user manuals; delivered end-user training sessions that accelerated platform adoption across 87 ULBs.

CSM Tech | India

Aug 2022 – Jul 2024

Software Engineer

- Designed and implemented scalable relational database schemas, stored procedures, and data access layers using Spring Data JPA and PostgreSQL for multiple enterprise client projects.
- Built and deployed RESTful APIs integrated with Angular 14 frontend, enabling real-time data synchronization and improving user experience for 5,000+ students.
- Implemented role-based access control (RBAC) using Spring Security, enforcing user permissions and ensuring compliance with institutional data privacy requirements.
- Optimized complex SQL queries and introduced connection pooling, reducing average database response time by 30%.

- Collaborated with UI/UX designers on branding, color themes, and interactive flows, leading to a 25% improvement in user engagement metrics post-launch.

KEY PROJECTS

Finance & Accounting System – UPYOG Haryana

Tech Stack: Java 8, Spring Boot, Microservices, PostgreSQL, Redis, REST APIs, Jenkins, AWS

- Implemented end-to-end Finance & Accounting module for 87 ULBs under the Haryana UPYOG e-Governance initiative, streamlining budget, voucher, and ledger operations.
- Developed and optimized Spring Boot microservices for voucher processing, bill register, and chart of accounts; integrated seamlessly with existing e-Gov modules.
- Conducted gap analysis and delivered system enhancements aligned with Haryana ULB finance workflows, reducing reconciliation errors by 60%.

Finance & Accounting System – UPYOG Delhi

Tech Stack: Java 8, Spring Boot, Microservices, PostgreSQL, React, REST APIs, GCP

- Customized and deployed the UPYOG Finance module for Delhi State Government; extended microservices to support Delhi-specific accounting standards and financial reporting requirements.
- Ensured smooth integration with property tax and procurement modules, eliminating data silos and enabling consolidated reporting for city finance administrators.
- Worked directly with functional teams during UAT to verify module functionality, achieving client sign-off within the scheduled timeline.

Campus Automation System

Tech Stack: Java, Spring Boot, Spring Security, PostgreSQL, Angular, REST APIs

- Developed backend microservices for student management, attendance tracking, fee management, and exam scheduling, automating workflows for 5,000+ students.
- Implemented Spring Security with RBAC, securing 15+ user roles and ensuring data isolation between departments.
- Designed normalized relational database schemas and optimized SQL queries, improving data access performance by 30%.

EDUCATION

Bachelor of Technology – Computer Science & Applications

2018 – 2022

DRIEM University, Cuttack, India

CERTIFICATIONS

- Java SE 8 Programming – Oracle (Recommended: Add upon completion)
- AWS Certified Developer – Associate (Recommended: Add upon completion)
- Spring Professional Certification – VMware (Recommended: Add upon completion)

KEY ACHIEVEMENTS

- Delivered Finance & Accounting modules for 87+ ULBs across Delhi and Haryana, impacting thousands of government users and streamlining multi-crore budget management workflows.
- Reduced PostgreSQL query execution time by 35% through indexing strategies, significantly improving application throughput under peak load.
- Decreased data reconciliation errors by 60% via system gap analysis and backend enhancements aligned with Haryana ULB finance workflows.
- Successfully onboarded 87 Urban Local Bodies onto the UPYOG platform within project deadlines through structured user training and documentation.
